**NAXCAT® MOD ACID**

**SULFONIC ACID BLEND, TSA/XSA**

**Description:** Nease Co. LLC manufactures a wide range of aromatic sulfonic acids. Aromatic sulfonic acids are made by sulfonating aromatic compounds with sulfuric acid, SO₃, or Oleum. They are comparable in strength to mineral acids such as sulfuric acid, but are especially suitable for organic reactions where an inorganic, mineral acid could cause charring, oxidation, or an unwanted chemical reaction.

**Naxcat® MOD ACID** is a TSA/XSA blend. The blend of acids promotes low freezing temperature for ease of handling while maintaining a high degree of acidity.
